Web Developer

EXPERIENCE

IBM - CLIENT INNOVATION CENTER | Web Developer
Oct 2017 - Present | Amsterdam, NL
- Began with a 6-month traineeship working with back-end development technologies: NodeJS, and the PHP framework, Symfony 4.
- Unit-testing with Mocha and Chai.
- Building and maintaining internal websites using front-end technologies: HTML, CSS and the JavaScript framework, VueJS.
- Front-end iOS development using Swift debugging and adding features to an existing internal app.
- Reviewed and tested teammates branches through GitHub Pull Requests.
- Comfortable working with MacOS and Windows.

SHECANCODE | Blogger
April 2017 - August 2018 | Remote
- Covered stories on technology, the tech industry, and gender equality
- Blog was awarded the 'Best Blog' of the month by SheCanCode (April, 2017)

LOYALTY LION | Sales Assistant
June 2016 | Remote
- Executed online research vetting potential business partners.
- Updated databases with new contact information.
- Extensive use of Excel.

PRESENTATIONS

TED TALKS YOUTH, AND PECHA KUCHA | Presentor
Feb and April 2014, respectively | Maastricht, NL
- Both presentations focused on my volunteer work in Muscat, Oman and Gush Kande, Bangladesh. In regards to Muscat, I spoke about my involvement with human rights organisations. As for Gush Kande, there I taught mathematics and English to students, and was part of a team who introduced iPads into the educational system of the village's schools.
